## **DETAILED ACTION**

Page 2

## **Double Patenting**

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-5 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2, 11 and 24-27 of U.S. Patent No. 6,666,841 to Gharib et al. Although the conflicting claims are not identical, they are not patentably distinct from each other because both documents teach the same invention, namely a method for treating a glaucoma wherein a trabecular shunt is placed between the anterior chamber and Schlemm's canal and transports the aqueous humor from the chamber into the canal. The shunt used comprises a pressure sensor, located inside of an implant, which uses radio frequency to deliver the information to the receiver and control unit. Instead of specifically claiming that the transported aqueous humor is located in the anterior chamber of an eye, Gharib teaches a creation of an opening in a trabecular meshwork of an eye, which is the area between Schlemm's canal and the anterior chamber. By having the shunt in the trabecular meshwork, the humor is transported from the anterior chamber to Schlemm's canal via delivery applicators deploying the bifurcatable element from inside of the shunt and into the meshwork.

## Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1 recites the limitation "the anterior chamber" in line 2. There is insufficient

antecedent basis for this limitation in the claim.

5. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Filip Zec whose telephone number is (703) 306-3446 or (571)

272-4815. The examiner can normally be reached on Monday through Friday, with the

exception of every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Denise Esquivel can be reached on (703) 308-2597 or (571) 272-4808. The fax

phone number for the organization where this application or proceeding is assigned is 703-872-

9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
